# Using a colour palette

Each joyous wedding moment is fuelled by the unique essence of the couple intermingled with a creative muse, the wedding planner.

*This couples' personality is found in every design aspect of their wedding. The groom has a strong graphic design background; this is the reason that bold hues, like bright yellow, were used in the colour palette. The bride is a teacher, hence the presence of books. Hundreds of books were covered in beautiful designer papers and also used as escort cards. The books sat alphabetically on the book shelf so that guests could search for their name and pick the book off the shelf as though they were in a library! What an innovative way to personalize your wedding day. Books also served as the table numbers. In place of favours, the couple made donations to the Cancer society. The donation details were printed on custom chocolate bar wrappers which were added to guests' place settings. That way, when*

*they unwrapped their custom chocolates all the particulars were printed on the back. No event is complete without a fully designed sweet table. Using their colour palette, coral, pink, and yellow shades were used to create a customized spread of delicious desserts: macaroons, lemon parfaits, and even brightly coloured champagne cocktails were on display. Giant lemonade dispensers were setup throughout the venue and had sparkling cranberry lemonade available for guests the entire night. There were adorable pink striped straws for them to use in their signature cocktails. Oversized white balloons were the perfect prop to add to the design. Each detail added to the unique character of the couple and developed the vision of their perfect day.*
